@rashidsarkar558@gmail.com

Dhaka, Bangladesh

CAREER OBJECTIVE

I'm a self-taught MERN stack developer with 1.5 years of learning experience. I specialize in React for UI, Node/Express for server-side development, and MongoDB for data storage. I'm skilled in Axios and Tanstack Query for optimized data fetching and currently learning Mongoose for advanced data modelling. I've worked on several projects and can design, develop, and deploy full-fledged MERN stack applications. I'm a fast learner with a strong work ethic and would love to contribute to your team.

PROJECTS

Luxe-Modern-Living-Platform

<https://stellar-malasada-952ea2.netlify.app>

Project feature

- Admin Credentials : Email: mglenn70@anio.site, Password: 123456
- Member Credentials : Email: aalmazey@bendnsend.com, Password: 123456
- Pioneered the development of Luxe, a modern living platform, implementing cutting-edge technologies including React, Node.js, and MongoDB
- Elevated user experience by orchestrating features such as hassle-free coupon management, intuitive checkout processes with applied discounts, seamless agreement creation, and transparent payment history tracking

Serfix -Automotive Marketplace

<https://sunny-klepon-b6a36d.netlify.app>

Project feature

- Effortless Car Transactions: Browse, buy, or sell cars seamlessly with a diverse inventory and streamlined user authentication
- User-Generated Transparency: User reviews and ratings enhance transparency, aiding informed decisions for buyers and showcasing reliability for sellers
- Optimized Shopping Experience: A responsive design ensures accessibility across devices, while the My Cart page facilitates smooth checkouts and real-time updates.
